

IXOOST

ARTISTIC AUDIO

MODENA • ITALY

Here in **Modena** people are defined by their driving passion and intricate relationships.

Whether they are farmers, tenors or technicians, they all turn real values into real things.

And in this sense, many things from Modena are made of emotions.

This is **ixOOST**: an **emotion for all senses**.

iXOOST creates luxury speakers for homes, where materials' quality and technical know-how merge to create a listening experience in perfect harmony with aesthetics.

It is not coincidence that the cradle of iXOOST is the same as the brands that have made the history of Italian automotive and motorsport. Every creation, indeed, is **handmade** and tailor-made in Modena, the heart of the **Italian Motor Valley**.

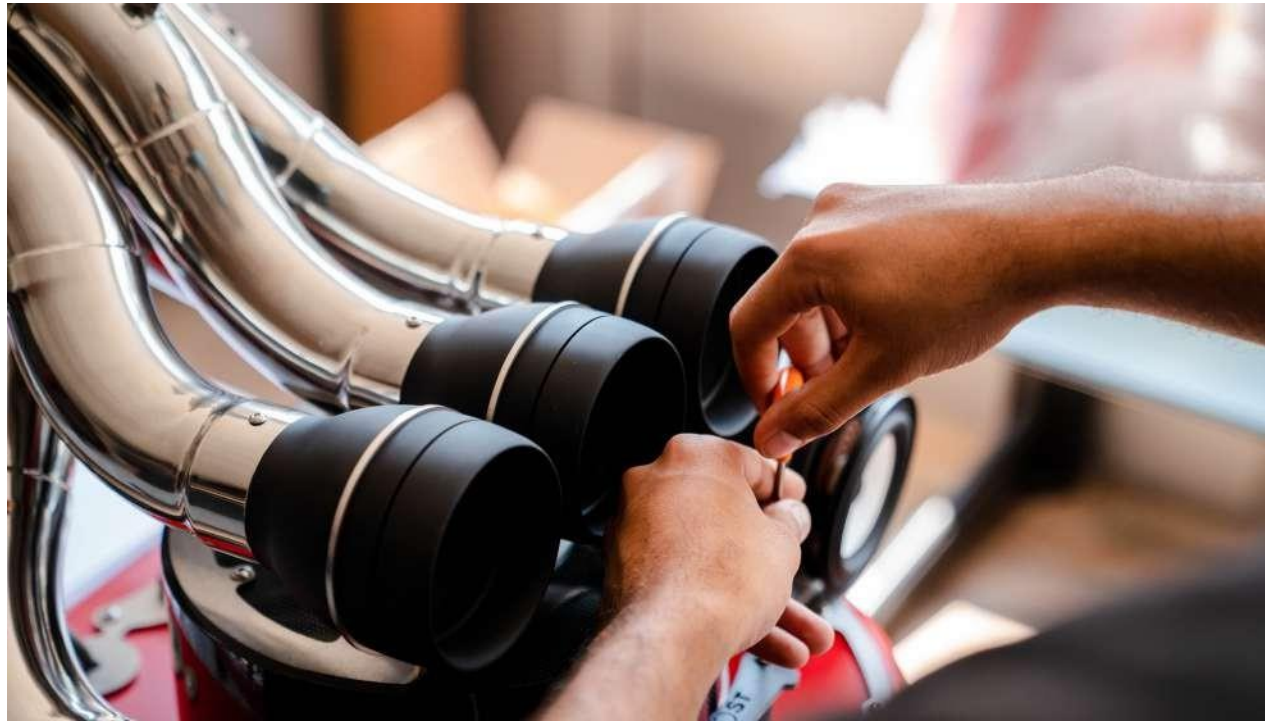

Mechanics and sound to be seen,
heard, and touched.
The very first three-dimensional high-
end speakers.
Painstaking craftsmanship for the
perfect audio experience.

Paying homage to the **craftsmanship** of Modena.

A city famous for the handmade construction of some of the world's most beautiful cars.

Extreme technical precision in the production process lies at the heart of every iXOOST.

Designed by us, **handmade** for you.

The **original components** of the most exclusive **hypercars** in the world and **F1 racing cars** become integral parts of IXOOST' creations with an active part in the reproduction of sound, making them **one-off pieces**.
